WEEKLY SUMMARY	14-15
FEEDSTUFFS: WHOLESALE PRICES	16-17
CROP PRODUCTION	18-19

HIGHLIGHTS:

Grain and soybean bids sharply lower this week with a large part of the decline posted Thursday. Wheat from 4 cents lower to 17 cents lower, the most decline on Hard Red Winter Wheat as dry weather is forecast for the long holiday weekend and the big combines are ready to roll out in Kansas. Corn 9 to 14 cents lower as rains move across the Eastern Cornbelt and dry weather forecast for the Western Cornbelt, making for ideal growing conditions. The crop looking very good. Sorghum 9 cents to 20 cents lower. Soybeans 11 cents to 14 cents lower after USDA estimated an expected record acres planted and weather very favorable for a record new crop production. Large carryover of stocks, ideal weather for new crop corn and soybeans, sunshine forecast or wheat harvest, and lack of export orders all a burden on the grain and soybean bids. Harvest pressure and nearby wheat prices suffer the most. Good crop conditions and new crop corn, sorghum, and beans hit the hardest. New lows established on the boards again for several months and commodities. Producers looking more and more at LDP's.

WHEAT:

Kansas US No 1 Hard Red Winter, ordinary protein 7 1/4 to 17 1/4 cents lower at 2.62 3/4-3.02 3/4 per bushel. Kansas City US No 2 Soft Red Winter 7 1/4 cents lower at 2.37 3/4-2.57 3/4 per bushel. St. Louis truck US No 2 Soft Red Winter terminal bid 4 cents lower at 2.21-2.22 per bushel. Minneapolis US No 1 Dark Northern Spring, 14 percent protein 11 cents lower at 3.47 1/2 per bushel. Portland US 1 Soft White Wheat 4 to 5 cents lower at 3.13-3.15 per bushel.

CORN:

Kansas City US No 2 rail White Corn 10 cents lower at 2.65-2.70 per bushel. US No 2 truck Yellow Corn 9 cents lower at 1.92-1.94 per bushel. Omaha US No 2 truck Yellow Corn 12 to 14 cents lower at 1.78-1.82 per bushel. Chicago US No 2 Yellow Corn 11 1/4 to 12 1/4 cents lower at 1.87 1/4-1.93 1/4 per bushel. Toledo US No 2 Yellow Corn 10 to 11 cents lower at 1.87 1/2-1.97 1/2 per bushel. Minneapolis US No 2 Yellow Corn 13 1/4 cents lower at 1.80 1/4 per bushel.

OATS AND BARLEY:

US No 1-2 non-milling rail Oats at Minneapolis had no quote. US No 3 or better Malting Barley, 70 percent or better plump out of Minneapolis had no quote. Portland US 2 Barley, unit trains and barges-export 5 to 10 cents higher at 4.25-4.30.

SORGHUM:

US No 2 yellow truck, Kansas City 9 to 16 cents lower at 3.09-3.13 per cwt. Texas High Plains US No 2 yellow sorghum 10 to 20 cents lower at 2.84-3.00 per cwt.

OILSEEDS:

Illinois Processors US No 1 Yellow Truck Soybeans 10 1/2 to 14 1/2 cents lower at 4.33 1/4-4.42 1/4 per bushel. Kansas City US No 2 Yellow Truck Soybeans 11 cents lower at 4.40 per bushel. Minneapolis Yellow truck soybeans 13 3/4 cents lower at 4.20 per bushel. Decatur 44 percent soybean meal, .50 lower at 128.50-132.50 per ton; 48 percent Soybean Meal, 1.50 to .50 lower at 136.50-139.50 per ton. Decatur crude Soybean oil 70 points lower at 15.59-15.84 cents per pound. Sunflower Crude Oil 110 to 60 points lower at 17.85-18.35 cents per pound.

Brewers Dried Grain prices were steady in Columbus at 80.00; St. Louis was not available.

WHEAT MILLFEEDS:

Wheat Middlings in Kansas City were 5.00 to 7.00 higher from 40.00-46.00; St. Louis was 1.00 to 2.00 higher from 52.00-55.00; Buffalo was mixed, 2.00 lower to 1.00 higher from 36.00-40.00; Memphis was 1.00 lower at 65.00; Minneapolis was 8.00 to 10.00 higher from 48.00-52.00. Offers for wheat millrun loaded truck FOB the flour mill in the Washington and Oregon during July were 1.00 to 3.00 higher from 50.00-53.00. Offers for August and September indicated at 50.00 in a limited test. Flour mills were generally running five and one-half to six days a week in the Pacific Northwest. Offers for wheat millrun rail delivered to Portland area feedmills were 3.00 lower at 61.00. Offers for wheat millrun delivered from the feed mill to the dairy were not well tested. Wheat millrun FOB the San Francisco Bay area mill door was 2.00 lower from 68.00-71.00; FOB the Los Angeles mill door was 1.00 lower from 70.00-73.00.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic beet molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is stronger, but large on hand supplies of molasses are sufficient to take care of the increased demand. Rice Bran was mixed, 17.00 lower to 2.00 higher, sharpest drops in Louisiana and Texas; Millfeed was mostly steady to 3.00 lower, except Arkansas was 1.00 to 3.00 higher; Hulls were steady to 3.00 lower. Alfalfa Meal was steady to 8.00 lower across the nation this past week.

May Weather Summary: A weather pattern similar to that observed during April carried through May, keeping several anomalies intact through a second consecutive month. The pattern left much of the West cool, the Great Lakes region warm, and southern Texas hot. In addition, most of the Plains and western Corn Belt remained wet, while large portions of the East and many areas along and near the Gulf Coast were unfavorably dry. Monthly temperatures averaged 2 to 4 degrees F above normal in the Great Lakes region, spurring the development of winter wheat and spring-sown crops. Departures also reached +4 degrees F across southern Texas. Readings ranged from 1 to 4 degrees F below normal in the Northwest and as much as 5 degrees F below normal in California's Central Valley, hindering crop development. Widespread frost and sub-freezing temperatures affected the Northwest through mid-month. Near-normal monthly temperatures prevailed in most other areas, including the Plains and the Southeast.

Monthly rainfall totaled 8 inches or more across parts of the east-central Plains and western Corn Belt, delaying spring planting and increasing disease pressure in winter wheat. Excessive precipitation (4 to 7 inches) also soaked much of North Dakota, hampering planting operations. Meanwhile, frequent rains, totaling more than 4 inches, eased dryness in the northern Mid-Atlantic region and across southern New England. Farther south, however, drought intensified in the shadow of the Appalachians, from the Chesapeake Bay watershed southwestward into the Piedmont of Georgia. Drought also persisted in northern Florida, but showers provided some relief and eased irrigation requirements in southern parts of the State. Despite cool weather and a record- to near-record snow pack in the Cascades, topsoil dryness worsened in the interior Northwest, stressing small grains.

General Crop Comments: May began with warmer, drier weather and gusty winds that rapidly removed excess moisture from soggy soils in the Corn Belt. The dry weather allowed corn planting to move ahead of the 5-year average for the first time this spring, as planters ran nearly around the clock for several days in many areas of the Corn Belt. Soybean planting remained slow, as the western Corn Belt concentrated on planting corn. In the eastern Corn Belt, especially in Ohio, soybean planting advanced more rapidly, as warmer, drier weather prevailed. Early-month thunderstorms that produced isolated hail, severe tornadoes, and heavy rains damaged some wheat fields in eastern Oklahoma and adjacent areas of Kansas and Missouri. The Tennessee Valley, and adjacent areas of the Southeast and lower Mississippi Valley, also received heavy rains that halted fieldwork and delayed planting. In the Atlantic Coastal Plains, planting progress lagged due to dry soils. Planting rapidly progressed in the lower Mississippi Valley despite rain delays in Mississippi. Persistent showers interrupted planting of small grains in the northern Great Plains, while drier weather aided planting in the High Plains and northern Rockies. Interior areas of the Pacific Northwest remained unfavorably dry, but crops steadily developed in California, despite a resumption of below-normal temperatures.

Corn and soybean planting remained ahead of normal as the month progressed despite additional rain delays in the western Corn Belt near mid-month. Warm weather aided crop development in the eastern Corn Belt, while the rain in the western Corn Belt softened crusted soils and allowed sprouted seeds to emerge. Storms in the southern Great Plains kept soils excessively wet in western Missouri and eastern parts of Kansas and Oklahoma. In the northern Great Plains, planting delays continued due to additional rainfall and poor drying conditions, while below-normal temperatures hindered development of seeded crops. Seasonable temperatures aided wheat development in the eastern Corn Belt and central and southern Great Plains. In the Atlantic Coastal Plains, planting accelerated after soils dried from earlier showers. Cotton planting was aided by dry, sunny weather in the Southeast and inland areas of the lower Mississippi Valley. Soaking rains provided much-needed moisture for planting and crop development along the western Gulf Coast. In the Pacific Northwest, dry soils continued to stress small grains, while cool weather hindered growth.

As the month came to an end, corn was 96 percent and soybeans were 71 percent planted. Eighty percent of the corn acreage and 37 percent of the soybean crop was emerged. Planting and emergence of both crops equaled or exceeded the normal pace in most of the Corn Belt. Eighty percent of the winter wheat crop was headed and 2 percent of the acreage was harvested at month's end, near the normal pace for both stages. Cotton planting, at 82 percent, and cotton squaring, at 7 percent, were near the 5-year averages. Rice planting was nearly complete, at 98 percent, and 93 percent was emerged, well ahead of the average and last year's slow pace. Planting and emergence of small grains lagged behind the 5-year averages. Spring wheat was 85 percent planted and 65 percent emerged. Barley was 83 percent planted and 63 percent emerged. Oats were 91 percent planted and 83 percent emerged. Sorghum planting also lagged behind normal, as 44 percent was planted by the end of the month. The peanut crop was 90 percent planted, compared with 82 percent last year.

FEEDSTUFFS: WHOLESALE PRICES, MAY 1999.....	23-24

HIGHLIGHTS:

Grain and soybean bids finished the week sharply lower with nothing too exciting to offer support, despite good export sales of wheat and corn. Favorable harvest and growing weather was the major pressure factor. Wheat 9 to 22 cents lower. Corn 13 to 20 cents lower. Sorghum 25 to 40 cents lower. Soybeans 27 to 33 cents lower. Rapid harvest progress pushed wheat bids sharply lower with warm, dry weather conditions in most winter wheat areas. Very good yields and high protein levels have been reported. Low prices spurred some export buying but tonnage figures remain very low. Corn and soybean bids fell sharply lower due to good growing conditions across the Midwest and Corn Belt areas. Crops are looking very good and some scattered rainfall has benefitted growing progress. Very good export orders of corn was reported this week, limiting declines. Soybean meal prices weakened, also weighing on bean bids.

WHEAT:

Kansas US No 1 Hard Red Winter, ordinary protein 19 1/2 to 22 1/2 cents lower at 2.43 1/4-2.80 1/4 per bushel. Kansas City US No 2 Soft Red Winter 12 1/2 cents lower at 2.25 1/4-2.45 1/4 per bushel. St. Louis truck US No 2 Soft Red Winter terminal bid 20 to 21 cents lower at 2.01 per bushel. Minneapolis US No 1 Dark Northern Spring, 14 percent protein 2 1/2 cents lower at 3.45 per bushel. Portland US 1 Soft White Wheat 9 to 11 cents lower at 3.04 per bushel.

CORN:

Kansas City US No 2 rail White Corn 25 cents lower at 2.40-2.45 per bushel. US No 2 truck Yellow Corn 17 to 18 cents lower at 1.75-1.76 per bushel. Omaha US No 2 truck Yellow Corn 18 cents lower at 1.60-1.64 per bushel. Chicago US No 2 Yellow Corn 13 to 20 1/2 cents lower at 1.66 3/4-1.80 1/4 per bushel. Toledo US No 2 Yellow Corn 19 3/4 cents lower at 1.67 3/4-1.77 3/4 per bushel. Minneapolis US No 2 Yellow Corn 18 1/2 cents lower at 1.61 3/4 per bushel.

OATS AND BARLEY:

US No 1-2 non-milling rail Oats at Minneapolis had no quote. US No 3 or better Malting Barley, 70 percent or better plump out of Minneapolis had no quote. Portland US 2 Barley, unit trains and barges-export 15 cents lower at 4.10-4.15.

SORGHUM:

US No 2 yellow truck, Kansas City 33 to 34 cents lower at 2.76-2.79 per cwt. Texas High Plains US No 2 yellow sorghum 25 to 40 cents lower at 2.59-2.60 per cwt.

OILSEEDS:

Illinois Processors US No 1 Yellow Truck Soybeans 27 1/4 to 33 1/4 cents lower at 4.00-4.15 per bushel. Kansas City US No 2 Yellow Truck Soybeans 27 to 30 cents lower at 4.10-4.13 per bushel. Minneapolis Yellow truck soybeans 32 cents lower at 3.88 per bushel. Decatur 44 percent soybean meal, 9.00 lower at 119.50-123.50 per ton; 48 percent Soybean Meal, 9.00 lower at 127.50-130.50 per ton. Decatur crude Soybean oil 50 to 65 points lower at 14.94-15.34 cents per pound. Sunflower Crude Oil 100 points lower at 16.85-17.35 cents per pound.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic beet molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. Early reports indicate that the U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was steady to 5.00 higher; Millfeed was mostly steady; Hulls were uneven, mostly steady. Alfalfa Meal was mostly steady across the nation this past week.

WEEKLY SUMMARY	20-21
FEEDSTUFFS: WHOLESALE PRICES	22-23

HIGHLIGHTS:

Hot weather and mid to late week export announcements offered price support after last week's sharp price declines. Also, traders thought the declines were a little overdone. However, crops are looking good at the moment. Wheat mixed, mostly 1 to 3 cents lower. Corn mixed, mostly 3 to 7 cents higher except Chicago and Minneapolis 1 to 2 cents lower. Sorghum 6 to 11 cents higher. Soybeans 12 to 24 cents higher. Mild weather but dry and wheat harvest made rapid progress. Few reports of shortage of storage space as yields and quality turned out to be better than most early estimates. Farmer selling and FSA offices are busy with LDPs. Weekly export announcements fair but not great. Corn export announcements were great, this the second week. Hot weather in the forecast and pollination is underway in many places. Ohio is very dry but Georgia received rain. Weather watchers are still ruling the Board. Almost 1.1 million tonne export announcements in the past two weeks did not really get too much respect. Early in the week, country elevator bids dropped below 1.50 per bushel and new crop bids down around 1.30. Soybean export announcements made a good showing this week for the first time in quite a while. Country elevator bids on soybeans are currently below 4.00 and 25 under the November contract is a popular basis for new crop. Crop ratings are good for soybeans.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. Early reports indicate that the U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was steady to 5.00 higher; Millfeed was mostly steady; Hulls were uneven. Alfalfa Meal was mostly steady across the nation this past week.

FEED:

WEEKLY SUMMARY.....	13-14
FEEDSTUFFS: WHOLESALE PRICES.....	15-16
CROP PRODUCTION.....	17-20

HIGHLIGHTS:

Grain and soybean bids finished the week sharply higher due to hot, steamy temperatures, crop rating declines, and good weekly export sales. Wheat 7 to 18 cents higher. Corn 4 to 10 cents higher. Sorghum 14 to 18 cents higher. Soybeans 2 to 14 cents higher. Wheat bids were supported by another week of good export orders with Egypt, Japan, and South Korea the major buyers. Strong corn and soybean trade was also a big factor in higher wheat bids. Wheat harvest is nearly complete most places. Good yields and protein levels limited gains. Continued hot, humid temperatures across the Midwest kept corn and soybean bids climbing sharply higher. Some rainfall was reported in the Corn Belt areas but many places remain dry. Concerns over crop stress was supportive to bids. More high temperatures are forecast over the next several days. Crop ratings declined early in the week due to the above normal temperatures. Export sales were fair for corn but good for soybeans late in the week.

WHEAT:

Kansas US No 1 Hard Red Winter, ordinary protein 8 1/4 to 11 1/4 cents higher at 2.48-2.95 per bushel. Kansas City US No 2 Soft Red Winter 13 1/4 to 18 1/4 cents higher at 2.35-2.50 per bushel. St. Louis truck US No 2 Soft Red Winter terminal bid 8 cents higher at 2.08 per bushel. Minneapolis US No 1 Dark Northern Spring, 14 percent protein 15 cents higher at 3.61 per bushel. Portland US 1 Soft White Wheat 7 to 9 cents higher at 3.08-3.12 per bushel.

CORN:

Kansas City US No 2 rail White Corn 10 cents higher at 2.45-2.50 per bushel. US No 2 truck Yellow Corn 8 cents higher at 1.86-1.88 per bushel. Omaha US No 2 truck Yellow Corn 7 to 8 cents higher at 1.71-1.75 per bushel. Chicago US No 2 Yellow Corn 4 3/4 to 10 3/4 cents higher at 1.70 1/2-1.89 1/2 per bushel. Toledo US No 2 Yellow Corn 9 3/4 cents higher at 1.84 1/2-1.94 1/2 per bushel. Minneapolis US No 2 Yellow Corn 1/4 cent lower at 1.59 1/2 per bushel.

OATS AND BARLEY:

US No 1-2 non-milling rail Oats at Minneapolis had no quote. US No 3 or better Malting Barley, 70 percent or better plump out of Minneapolis had no quote. Portland US 2 Barley, unit trains and barges-export 15 to 20 cents higher at 4.30-4.40.

SORGHUM:

US No 2 yellow truck, Kansas City 18 cents higher at 3.04-3.08 per cwt. Texas High Plains US No 2 yellow sorghum 14 to 15 cents higher at 2.80-2.82 per cwt.

OILSEEDS:

Illinois Processors US No 1 Yellow Truck Soybeans 2 3/4 to 8 3/4 cents higher at 4.27 1/4-4.30 1/4 per bushel. Kansas City US No 2 Yellow Truck Soybeans 14 cents higher at 4.48 per bushel. Minneapolis Yellow truck soybeans 11 3/4 cents higher at 4.16 1/4 per bushel. Decatur 44 percent soybean meal, 5.00 to 7.50 higher at 129.00-131.00 per ton; 48 percent Soybean Meal, 7.00 to 5.00 higher at 135.00-138.00 per ton. Decatur crude Soybean oil 33 points higher at 15.47-15.87 cents per pound. Sunflower Crude Oil 65 points higher at 17.25-17.75 cents per pound.

Offers for wheat millrun rail delivered to Portland area feedmills were mixed, 1.00 lower to 1.00 higher from 64.00-66.00. Offers for wheat millrun delivered from the feed mill to the dairy were indicated at 69.00, but were not well tested. Wheat millrun FOB the San Francisco Bay area mill door was 1.00 to 6.00 lower from 59.00-65.00; FOB the Los Angeles mill door was 2.00 to 8.00 lower from 61.00-68.00.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. Early reports indicate that the U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was mostly 3.00 to 5.00 higher; Millfeed was uneven; Hulls were steady to 2.00 lower. Alfalfa Meal was mostly steady across the nation this past week.

Crop Production

All Wheat Production Down 9 Percent from 1998

Winter wheat production is forecast at 1.67 billion bushels. This is up 4 percent from last month but down 11 percent from 1998. The U.S. yield is forecast at 47.0 bushels per acre, up 2.3 bushels from last month and a new record high. Hard Red Winter, at 1.03 billion bushels, is up from a month ago by 5 percent. White Winter is down for the second consecutive month and now totals 199 million bushels. Soft Red Winter is up 6 percent from the last forecast, at 443 million bushels. Durum wheat production is forecast at 132 million bushels, down 6 percent from 1998. The U.S. yield is forecast at 32.7 bushels per acre, 5.1 bushels less than last year. Other Spring wheat production is forecast at 527 million bushels, down less than 1 percent from 1998. The U.S. yield is forecast at 35.3 bushels per acre, 0.4 bushels higher than last year. Of this total, 475 million is Hard Red Spring wheat, down 2 percent from last season.

June Weather Summary: Frequent heavy rainfall disrupted winter wheat harvesting on the central and southern Plains until month's end, when warmer, drier air overspread the region. In addition, strong thunderstorms and hail damaged cotton on parts of the southern Plains. In the Southeast widespread rains improved soil moisture and stabilized crop conditions. In contrast, drought worsened from the Mid-Atlantic region into southern New England, as monthly rainfall totaled less than 50 percent of normal in many areas and 1-year precipitation deficits topped 15 inches at some locations. Drought also continued to adversely affect dryland crops in the interior Northwest, where late-June showers provided only localized relief from the 4-month dry spell. The Southwest experienced several seasons compressed into a single month, as early June featured very cool weather and winter-like storm systems, and late June showcased very hot weather and the gradual onset of seasonal (monsoon) thunderstorms. Across the northern Plains and western Corn Belt, occasional showers and thunderstorms maintained adequate to locally surplus soil moisture for developing summer crops. Meanwhile in the easternmost Corn Belt, warm and often dry weather reduced soil moisture to unfavorable levels,

although late-month rains benefited corn and soybeans. Following June's very cool start in the Southwest, temperatures soared well above normal. The region's overall monthly temperature departures varied widely, ranging from -5 degrees F in California's San Joaquin Valley to +2 degrees F in parts of Arizona. Elsewhere, monthly temperatures averaged as much as 4 degrees F below normal in the Plains and Northwest. Near-normal temperatures prevailed in the Southeast, while readings ranged from 1 to 4 degrees F above normal in the Great Lakes region.

General Crop Comments: Numerous storm systems provided ample rain to maintain soil moisture levels and support crop development in most areas of the Corn Belt, parts of the central and southern Great Plains, lower Mississippi Valley, and adjacent areas of the Southeast. Some pockets within these areas received excessive rainfall and experienced hail, wind, and flood damage. Field activities were hampered throughout the month in eastern areas of Oklahoma and Kansas due to persistent rain and muddy soils. The winter wheat harvest fell behind the 5-year average early in the month and continued to lag through the end of the month, mostly due to slow progress in Oklahoma and Kansas. Sorghum planting was also hampered by rain in Oklahoma and Kansas. In Iowa, heavy rains eroded soils and standing water damaged some corn and soybean fields. A few isolated corn fields had a yellow appearance due to lingering soil wetness. Rain partially eased drought conditions in some areas of the Atlantic Coastal Plains, but soils remained short of moisture in many areas and crops were increasingly stressed, as temperatures steadily climbed during the month. Soil moisture ranged from slightly dry to favorably moist across most of the northern Great Plains during most of the month. Seasonal temperatures promoted near-normal crop development across most of the Nation during June. Corn and soybeans developed slightly ahead of normal in most areas of the Corn Belt. By mid-month, nearly all of the corn and more than 80 percent of the soybeans were emerged. Corn silking and soybeans blooming were slightly ahead of the 5-year average on July 4. Cool weather hindered small grain development in the northern Great Plains and Pacific Northwest until mid-month, when warmer weather accelerated growth. On July 4, spring wheat was 49 percent headed, 2 percentage points ahead of the average, and barley was 43 percent headed, 4 percentage points behind the average. Despite dry soils that hindered planting in the Atlantic Coastal Plains early in the month, nearly all of the cotton was planted by mid-month. Growth was aided by near-normal temperatures and adequate soil moisture in the lower Mississippi Valley and eastern Texas, but development progressed slightly behind normal due to below-normal temperatures in the Southeast and southern High Plains. As of July 4, cotton squaring or beyond was at 66 percent and cotton setting bolls or beyond was at 16 percent. Both stages were 3 percentage points behind the 5-year average. Rice developed ahead of normal along the western Gulf Coast, but lagged slightly behind the 5-year average in interior areas of the lower Mississippi Valley. Seventeen percent of the acreage was headed on July 4, equal to last year but ahead of the normal pace. In Texas and Louisiana, more than one-half of the crop was headed.

Oats: Production is estimated at 161.3 million bushels, 4 percent below last year's 167.1 million bushels. If realized, production would be the third lowest on record. The estimated yield is 61.1 bushels per acre, up 0.7 bushel from 1998. This would be the third highest yield on record. Area for harvest was unchanged from the previous estimate of 2.64 million acres. As of July 4, 75 percent of the acreage in the 9 major oat-producing States was rated good or better and only 5 percent was in poor or very poor condition. Early planting, warm weather, and good moisture supplies aided development in most areas of the Corn Belt during the spring. Conditions deteriorated in Ohio and Pennsylvania, as a hot, dry weather pattern developed in late June. In North Dakota, planting progress lagged behind normal through most of the spring, but above-normal temperatures during most of May and June accelerated development and partially compensated for the slow planting progress. By July 4, 72 percent of the crop was headed in the 9 major oat-producing states, compared with the 5-year average of 67 percent. Nearly one-third of the acreage was headed in North Dakota, slightly ahead of the normal progress of 31 percent.

Barley: Production for 1999 is forecast at 295 million bushels, down 16 percent from a year ago and down 18 percent from 1997. The first forecast for 1999 indicates that producers expect yields to average 60.3 bushels per acre, a slight increase from last year. Area harvested and to be harvested, at 4.89 million acres, is 17 percent below the 5.87 million acres harvested the previous year. In comparing yields to the previous year, 12 states are expecting higher yields in 1999 while 15 States are indicating lower yields or no change from 1998. The yield decline from last year in North Dakota was more than offset by the increase in Montana. Producers in North Dakota, the largest barley acreage state, expect yields to average 50 bushels per acre, a decrease of 5 bushels below the 1998 yield. All of the Middle Atlantic states expect an increase in yields as hot, dry weather limited disease problems. Barley harvest was ongoing or nearing completion in Arizona, southern California, and most Eastern States.

Winter Wheat: Acres for harvest as grain are forecast at 35.6 million, down 11 percent from 1998. Harvest progress in the 19 major producing states had reached 45 percent completion by July 4. This trailed well behind last year's rapid harvest and lagged normal by eight points. In general, Soft Red Winter (SRW) states are ahead of average harvesting progress while Hard Red Winter (HRW) trailed. Harvested yields were better than previously expected in the SRW states, some spectacularly so. Arkansas, Indiana, Kentucky, Louisiana, and Tennessee now expect new record highs. These states joined Alabama and Mississippi where records had been forecast a month ago. Collective head count forecasts dipped in the SRW Objective Yield states (Illinois, Missouri, Ohio), but average weight per head is up 9 percent. Forecasted head counts from the Objective Yield surveys in the six HRW states (Colorado, Kansas, Montana, Nebraska, Oklahoma, Texas) are up slightly from last month, but weight per head is up a collective 15 percent and is near last year's record. The Texas harvest moved into the High Plains by late June. California's San Joaquin Valley harvest was complete by July 1; minimal disease problems are reported in the Sacramento Valley crop. New Mexico's dryland yields are the best in years. Combined plant populations in the Pacific Northwest Objective Yield region are higher than average, but forecasted head weight is still lower than normal. Yield prospects improved in Nevada and Utah, but dimmed somewhat in New York. The Utah yield is a new record.

Durum Wheat: Area for 1999 grain harvest is expected to total 4.05 million acres, up 9 percent from last year. Excellent yields have been reported from California's Imperial Valley crop where harvest finished around July 1. Arizona harvest reached 93 percent completion by July 4. Late planting has the Montana acreage trailing average progress, but prospects are good for this year. Modest yield increases are expected in Minnesota and South Dakota Durum. North Dakota's late planted crop trails average development by several days.

Other Spring Wheat: Harvested area is forecast at 15.0 million acres, down 1 percent from last year. Acreage was 49 percent headed in the five major producing states, two points ahead of normal. Yield prospects are up from 1998 in Nevada, Utah, and Wyoming. The Pacific Northwest (Idaho, Oregon, Washington) production forecast is up from a year ago due to jumps in acreage; yields are down in all three states. Idaho's cool, dry season has the crop developing slowly. The Oregon spring wheat has also been slowed by cool temperatures. Dryness has stressed the Washington crop and development trails average by one to two weeks. Montana's spring crop is in good-to-excellent condition, but lags average development. Minnesota's crop is in mostly fair-to-good condition while the Dakota's spring wheat crops are rated as mostly good. Scab has been reported in eastern North Dakota districts.

HIGHLIGHTS:

Continued triple digit temperatures throughout the Nation but corn, sorghum, and soybean bids lower to sharply lower this week. This partly a reaction to last week's higher trends. Wheat higher again this week in addition to substantial advances last week. Export announcements and indications of additional foreign orders spurred demand. Wheat steady to 5 cents higher except Minneapolis which had been posting substantial gains 21 cents lower this week. Corn unevenly 2 to 10 cents lower. Sorghum 2 to 8 cents lower. Soybeans 12 to 29 cents lower. Wheat export announcements have been very good the past month. Harvest pressure had pushed prices down to record low levels and foreign buyers moved into the market. However, the International Grain Commission increased World stock estimates and raise coarse grain production figures this week. The heat goes on but corn prices turned lower this week. Heat index of 100 and 115 degrees persisted throughout the Midwest for the past two weeks. Corn crop conditions deteriorating but much of this was written into last week's higher trends. Forecasts calls for rains and cooler temperatures next week. A month of good export orders failed to offer much support and bids remained at a very low level. It is too early to fully assess heat damage. This years crop is reaching the maturity lever, especially early corn down south, but it is still a weather market. Soybean bids continue on a roller coaster, 5 percent declines one day and 5 percent advances the next, not uncommon. Extreme temperatures not hurting the crop substantially at this stage of the growing season. No export announcements this week but a substantially volume on the books last week.

OTHERS:

Prices on Sugarcane Molasses were steady, with the exception of Savannah which was 5.00 lower. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. The U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was steady to 5.00 lower; Millfeed was mostly steady; Hulls were steady. Alfalfa Meal was mostly steady across the nation this past week.

HIGHLIGHTS:

Weather continued to rule the market this week with some export interest also offering support. Wheat 8 to 15 cents higher. Corn 15 to 22 cents higher. Sorghum 40 to 41 cents higher. Soybeans 36 to 46 cents higher. Wheat bids were moderately higher for the week following corn and soybean bids upward. Yields in spring wheat crop is reported less than last years. Export sales were very light this week with Japan the only buyer but indications that Pakistan could enter soon, boosted bids. Corn and soybean bids were sharply higher for the week as rains forecast for the Midwest and Corn Belt area were not as widespread as hoped and dry conditions continue in many areas. Traders are concerned as USDA lowered crop condition ratings this week for both corn and soybeans. Hot temperatures have moved out but moisture is greatly needed. Export sales were nil for corn this week but good for soybeans with Taiwan buying a substantial amount earlier in the week. South American crops are reported doing very well.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. The U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was steady to 3.00 higher; Millfeed was mostly steady to 2.0 lower; Hulls were steady. Alfalfa Meal was mostly steady across the nation this past week.

HIGHLIGHTS:

Grain and soybean bids finished the week sharply lower in reaction to good rainfall across the middle U.S. and Thursday's bearish USDA's Crop Production report. Wheat 8 to 17 cents lower. Corn 9 to 22 cents lower. Sorghum 20 to 24 cents lower. Soybeans 18 to 27 cents lower. Wheat bids were sharply lower in sympathy with corn and bean bids as well as good wheat yields and high protein levels being reported in many areas. Some rainfall slowed harvest late this week, limiting declines. Export sales were slow to come and there was nothing exciting enough to underpin bids. Scattered rainfall across the upper Mid-west and Corn Belt areas the past two days, pushed corn and soybean bids lower. However, the major weakening factor was USDA's Crop Production report Thursday which forecast this years corn crop at 9.56 billion bushels, up from early predictions. Average yields are estimated at 134.7 bushels per acre and if realized, would be a record crop. The recent rainfall isn't expected to improve crop condition ratings but will help filling stage and moisture content in corn. Soybeans will benefit the most from the rainfall. USDA estimate soybean production at 2.87, up 10 million from last year's figure of 2.76. Export sales were good this week for corn and soybeans.

WHEAT:

Kansas US No 1 Hard Red Winter, ordinary protein 8 ½ cents lower at 2.57 1/4-2.94 1/4 per bushel. Kansas City US No 2 Soft Red Winter 8 ½ cents lower at 2.47 1/4-2.62 1/4 per bushel. St. Louis truck US No 2 Soft Red Winter terminal bid 17 cents lower at 2.08-2.09 per bushel. Minneapolis US No 1 Dark Northern Spring, 14 percent protein 11 cents lower at 3.31 ½ per bushel. FEED:

WEEKLY SUMMARY.....	20-21
FEEDSTUFFS: WHOLESALE PRICES.....	22-23

HIGHLIGHTS:

Grain and soybean bids finished the week sharply higher, supported by improved export demand for wheat and corn, declines in crop condition ratings, and delayed spring wheat harvest. Wheat 7 to 18 cents higher. Corn 3 to 11 cents higher. Sorghum 5 to 9 cents higher. Soybeans 17 to 24 cents higher. Wheat bids regained last week's losses as export sales improved with several countries buying U.S. grains. Spring wheat prices were lifted due to rain delays in harvest and some quality declines in yields. Stronger corn and bean bids also boosted wheat bids. Export sales were good for corn this week. USDA cut crop condition ratings again but corn is made for the most part. Hotter temperatures moved across the Corn Belt with only scattered showers reported. Many areas remain dry and soybean crops stand to suffer the most. Beans are in the pod filling stage and more moisture is needed as the Eastern Corn Belt and Delta areas still dry. Export sales were nil for soybeans this week, limiting gains.

WHEAT:

Kansas US No 1 Hard Red Winter, ordinary protein 13 1/4 to 18 1/4 cents higher at 2.70 1/2-3.12 1/2 per bushel. Kansas City US No 2 Soft Red Winter 8 1/4 to 13 1/4 cents higher at 2.55 1/2-2.75 1/2 per bushel. St. Louis truck US No 2 Soft Red Winter terminal bid 14 to 15 cents higher at 2.23 per bushel. Minneapolis US No 1 Dark Northern Spring, 14 percent protein 14 1/2 cents higher at 3.46 per bushel. Portland US 1 Soft White Wheat 7 to 10 cents higher at 3.13-3.15 per bushel.

CORN:

Kansas City US No 2 rail White Corn 10 cents higher at 2.35-2.40 per bushel. US No 2 truck Yellow Corn 3 to 4 cents higher at 1.86-1.87 per bushel. Omaha US No 2 truck Yellow Corn 6 to 11 cents higher at 1.70 per bushel. Chicago US No 2 Yellow Corn 1 1/4 cent lower to 3 3/4 cents higher at 1.69-1.98 per bushel. Toledo US No 2 Yellow Corn 3 3/4 cents higher at 1.90-1.98 per bushel. Minneapolis US No 2 Yellow Corn 1/4 cent lower at 1.64 per bushel.

OATS AND BARLEY:

US No 1-2 non-milling rail Oats at Minneapolis had no quote. US No 3 or better Malting Barley, 70 percent or better plump out of Minneapolis had no quote. Portland US 2 Barley, unit trains and barges-export 5 cents higher at 4.20-4.30.

SORGHUM:

US No 2 yellow truck, Kansas City 6 to 9 cents higher at 3.24 per cwt. Texas High Plains US No 2 yellow sorghum 5 to 9 cents higher at 3.00-3.10 per cwt.

OILSEEDS:

Illinois Processors US No 1 Yellow Truck Soybeans 21 1/2 to 23 1/2 cents higher at 4.58 3/4-4.74 3/4 per bushel. Kansas City US No 2 Yellow Truck Soybeans 22 to 24 cents higher at 4.58 per bushel. Minneapolis Yellow truck soybeans 17 1/2 cents higher at 4.39 3/4 per bushel. Decatur 44 percent soybean meal, 8.00 to 6.50 higher at 134.50-137.00 per ton; 48 percent Soybean Meal, 6.00 to 6.50 higher at 138.50-144.00 per ton. Decatur crude Soybean oil 123 to 114 points higher at 17.03-17.08 cents per pound. Sunflower Crude Oil 10 points higher at 18.80-19.55 cents per pound.

OTHERS:

Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. The U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Rice Bran was steady to 5.00 lower; Millfeed was mostly steady to 3.00 lower; Hulls were steady. Alfalfa Meal was mostly steady to 5.00 lower across the nation this past week.

WEEKLY SUMMARY.....	13-14
FEEDSTUFFS: WHOLESALE PRICES.....	15-16
CROP PRODUCTION for JULY 1999.....	17-22

HIGHLIGHTS:

Wheat bids were mostly lower for the week, pressured by active spring wheat harvest and good yields. However, good export demand for soft red winter wheat, offered some support. Corn bids were sharply lower on good crop condition and record yield potential. Fairly good export orders this week offered some strength to corn bids. Soybean bids fell moderately lower on favorable growing weather, good crop condition and late week profit taking on the Board. Some support stemmed from improved export interest. Wheat 1 to 7 cents lower except St. Louis 1 to 2 cents higher. Corn 5 to 20 cents lower except Minneapolis 4 cents higher. Sorghum 15 to 20 cents lower. Soybeans 2 to 7 cents lower except Minneapolis 8 cents higher. Light declines in wheat bids this week were due to spring wheat harvest pressure and good yields reported. Elevators are full in most areas with good protein levels being reported. Export sales were good this week as Korea, Egypt, and Japan the major buyers. Sharp declines in corn bids were a reaction to uncertain crop conditions due to recent dry weather in many areas. Export sales were okay but many were disappointed in the total tonnage figures. Add this to the big numbers last week and overall totals are not too bad. Some areas reported early harvest but low yields are being seen, as dry weather cut yields and promoted early maturity. Other areas are expecting near record yields, especially the Western Corn Belt. Soybean bids were lower on some profit taking due to smaller than expected July Census crush and large Census meal stocks. Favorable weather in the Midwest added pressure but a hint of concern over possible early frost, limited declines. Light export sales were reported for soybean products.

OTHERS: Prices on Sugarcane Molasses were steady. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the domestic sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. The U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. The full effects of Hurricane Bret are not known at this time, but there is a possibility of crop damage in the Texas Sugar Cane growing area. Rice Bran was mixed 2.00 lower to 3.00 higher; Millfeed was mixed; 2.00 lower to 1.00 higher; Rice Hulls were steady to 2.00 higher. Alfalfa Meal was mostly steady to 2.00 lower across the nation this past week.

Crop Production

Corn Production Down 2 Percent Soybean Production Up 4 Percent

Corn production is forecast at 9.56 billion bushels, down 2 percent from last year but up 4 percent from 1997. Based on August 1 conditions, yields are expected to average 134.7 bushels per acre, up 0.3 bushels from a year ago. If realized, this would be the third largest production and second highest yield on record. Acreage for grain harvest is estimated at 71.0 million acres, down 84,000 acres from June. Soybean production is forecast at a record high 2.87 billion bushels, up 4 percent from last year's record of 2.76 billion bushels. Based on August 1 conditions, yields are expected to average 39.2 bushels per acre, up 0.3 bushels from 1998 but 2.2 bushels below the record set in 1994. Acreage for harvest is estimated at a record 73.3 million acres, up 3 percent from 1998 but down fractionally from June.

All wheat production is placed at 2.31 billion bushels, down 1 percent from the July forecast and down 9 percent from 1998. Based on August 1 conditions, the U.S. yield is forecast at 42.5 bushels per acre, down 0.2 bushels from last month.

-Special Notes-

REMINDER: All forecasts in this report are based on conditions about August 1 and do not reflect any possible weather affects since that time.

July Weather Summary

A late-month heat wave brought the highest temperatures in 4 to 11 years across much of the Midwest and Ohio Valley, stressing livestock, pastures, and reproductive summer crops. Record-setting heat overspread the Southeast toward month's end, negating the benefits of late June and early July rainfall that had stabilized crop conditions. In the Mid-Atlantic region, where 13-month moisture deficits topped 18 inches in a few areas, the focus of extreme drought remained centered on an area that included eastern West Virginia, northern Virginia, and Maryland. Drought also intensified across the interior Northwest, where moisture deficits mounted in most areas for the fifth consecutive month. In contrast, a banner start to the summer rainy season across the Southwest improved water supplies and eased long-term drought, but caused localized flooding.

Midwestern, Northeastern, and Mid-Atlantic temperatures generally ranged from 2 to 5 degrees F above normal. In contrast, readings averaged as much as 4 degrees F below normal in California and on the northern High Plains. Damp, cloudy weather held temperatures as much as 2 degrees F below normal in the Southwest. Despite the late-month heat wave, near-normal readings prevailed in the Gulf Coast States. Monthly rainfall totaled more than 8 inches in a few areas across the upper Midwest, in the southern Appalachians, and along the eastern Gulf Coast. In the Southwest, the heaviest monsoon showers fell in Arizona, with 4 to 8 inches or more observed at some central and southeastern locations. In contrast, rainfall was less than 0.50 inch (and less than 50 percent of normal) in most of Oregon, southeastern Washington, the northern two-thirds of Nevada, the southern two-thirds of Idaho, and northwestern Utah. Farther east, totals were less than 2 inches (and less than 50 percent of normal) in a broad belt from north-central Texas to the middle Ohio Valley, including the east-central Plains and the southwestern Corn Belt. Similar dryness also occurred from northern Virginia to southern New England.

General Crop Comments: As July began, most areas of the Corn Belt, had adequate soil moisture to support crop development. By mid-month, corn and soybeans in the eastern Corn Belt and Atlantic Coast States were stressed by moisture shortages and above-normal temperatures. During the second half of the month, crop conditions continued to deteriorate as hot, dry weather extended westward into central and southwestern areas of the Corn Belt. In the northern Corn Belt, including most of Wisconsin and Iowa, and parts of Illinois, Minnesota, Nebraska, and South Dakota, numerous storms provided enough rainfall to maintain adequate soil moisture and prevent serious heat damage to crops. A few severe storms flooded low-lying fields in northern Iowa near mid-month. The hot weather promoted rapid development, as both corn and soybeans progressed ahead of normal, especially in the eastern Corn Belt. By August 1, 91 percent of the corn acreage was at the silking stage or beyond, compared with the average of 78 percent. Nearly one-fourth of the crop was at the dough stage or beyond, 8 percentage points ahead of normal. Soybeans blooming advanced to 85 percent and nearly one-half of the acreage was setting pods. Normally, 75 percent of the crop is blooming and 34 percent is setting pods by August 1.

Early-month storms recharged dry soils in the Southeast, and provided much-needed moisture for drought stunted crops, especially in Georgia. Mid-month storms rejuvenated crops in the Atlantic Coastal Plains, but by the end of the month, crops were stressed by soil moisture shortages and excessive heat. Cotton development progressed behind the 5-year average during the first half of the month, when mostly cool and seasonal temperatures prevailed. After mid-month, above-normal temperatures accelerated development, and by August 1, acreage at the squaring stage or beyond was nearly complete and more than three-fourths of the crop was setting bolls. Both stages were virtually equal to the 5-year average on August 1. Cotton harvest began along the western Gulf Coast near the end of the month. In California, persistent cool weather hindered crop development.

The wheat harvest quickly accelerated in Kansas, Oklahoma, and Missouri after wet soils dried. By mid-month, the wheat harvest was nearly complete in Kansas and the Corn Belt, and combining was active in Colorado, Nebraska, and South Dakota. In the upper Mississippi Valley and across the northern Great Plains to the Pacific Northwest, small grain development accelerated, as cool early-month weather was replaced by record setting triple-digit temperatures during the second half of the month. The oat harvest began early and progressed ahead of normal in the Corn Belt. Most of the acreage in Iowa, Nebraska, and Ohio was harvested by the end of the month. In North Dakota, the harvest season was just starting. Growers began combining spring wheat and barley late in the month and by August 1, 20 percent of the spring wheat and 19 percent of the barley was harvested in South Dakota .

The rice crop developed ahead of normal along the western Gulf Coast, but lagged in inland areas of the lower Mississippi Valley and in California. Dry weather aided harvest progress in Texas and Louisiana, where 11 and 20 percent, respectively, was harvested by August 1.

Corn for grain: Acreage planted to corn is estimated at 77.6 million acres, unchanged from the June estimate, but down 3 percent from last year. Acreage for grain harvest is estimated at 71.0 million acres, down 84,000 acres from June. Grain acreage was lowered in several mid-Atlantic States due to drought conditions. An additional acreage change was made in Michigan since their crop has advanced rapidly under ideal conditions and farmers expect to harvest a larger percentage of their acreage for grain.

The August 1 Corn Objective Yield data indicate a record level stalk count for the seven objective yield States (Illinois, Indiana, Iowa, Minnesota, Nebraska, Ohio, Wisconsin). After a wet start, corn planting progressed rapidly in early-May. Iowa and Illinois planted half of their corn acreage in one week, as progress moved ahead of the 5-year average. Above-average temperatures in June and July provided plenty of growing degree days and pushed silking ahead of both 1998 and the average. In the northern and western Corn Belt, numerous storms provided enough rainfall to maintain adequate soil moisture and prevent serious heat damage to the crop.

Yield for the 34 States without an Objective Yield Survey is forecast at 117.1 bushels per acre, up from 114.4 in 1998. Twenty-one States are showing an increased yield from last year, primarily due to a return to more normal growing conditions after severe drought in Texas and the Southeast last year. Twelve states are showing a yield decrease and one State is unchanged. With the exception of the drought stricken mid-Atlantic States, favorable growing conditions prevailed over most corn growing areas through early-July. However, hot and dry weather moved westward in late-July and began to deteriorate crop conditions.

Sorghum for Grain: The first production forecast for the 1999 crop year is 588 million bushels, up 13 percent from 1998 but 7 percent below 1997. Based on August 1 conditions, yield is forecasted at 69.2 bushels per acre, up 1.9 bushels from 1998. Yield increases are expected in 12 of the top 18 producing States, mainly in the southern part of the growing area. The forecasted yield in Texas would be a new record high. Predicted yields in Mississippi and Georgia would equal record high yields. A 7 bushel decrease from last year in Kansas (the largest sorghum producing state) limited the increase in the U.S. forecast.

Sorghum planted for all purposes is estimated at 9.30 million acres, up 3 percent from June, but 3 percent below 1998. Acreage was revised due to additional acreage being planted in Texas behind abandoned cotton. Texas planted a total of 3.1 million acres, an increase of 250,000 acres from the June estimate.

Acreage expected to be harvested for grain in the U.S. in 1999, at 8.50 million acres, is 10 percent higher than the 1998 harvested grain acreage. An adjustment to the harvested acres estimated in the June "Acreage" report was made for Texas due to the increase in planted acreage. Texas producers expect to harvest 2.9 million acres for grain, 200,000 more than estimated in June.

The 1999 sorghum crop was rated 68 percent good to excellent as of the week ending August 1. This is 17 points higher than a year earlier, primarily due to improved conditions in the southern growing region which was plagued by drought last year.

Oats: Production is estimated at 162.1 million bushels, 3 percent below last year's 167.1 million bushels. If realized, production would be the third lowest on record, exceeding the 1995 production by 1.0 million bushels and the record low in 1996 by 8.9 million bushels. The estimated yield is 61.6 bushels per acre, up 1.2 bushels from 1998. This would be the third highest yield on record, behind the record 65.4 bushels in 1992 and the 63.6 bushels in 1985. Area harvested and to be harvested for grain is estimated at a record low 2.63 million acres, 5 percent below last year. The decline is a continuation of a trend that has seen harvested acres steadily fall from more than 18 million acres in 1970 to the current level. Hot weather quickly ripened oat fields in the Corn Belt and northern Great Plains during the second half of July. Excessive heat stressed late-maturing fields in Michigan and Ohio. Scattered rain periodically interrupted harvest progress in Iowa, Minnesota, and Wisconsin, but delays were minimal in most areas. By August 1, 40 percent of the crop was harvested, including most of the acreage in Iowa, Nebraska, and Ohio. In North Dakota, harvest began late in the month, with 4 percent of the crop harvested on August 1.

Barley: Acres for planted and harvested for 1999 were lowered 70,000 and 59,000 acres, respectively, from June. Barley planted for all purposes is estimated at 5.17 million acres, down 1 percent from June and 19 percent below 1998. Acreage expected to be harvested for grain in 1999, at 4.83 million acres, is 18 percent lower than the 1998 harvested grain acreage. Acreage was updated due to reductions in North Dakota.

Production for 1999 is forecast at 281 million bushels, down 5 percent from July and down 20 percent from 1998. Yields are expected to average 58.2 bushels per acre, a decrease of 2.1 bushels from July and 1.9 bushels from last year. Yields were decreased in Idaho, Kansas, Minnesota, and Montana while increases were in Oregon, Pennsylvania, and South Dakota. In comparing yields to the previous year, 15 states are indicating lower yields or no change in 1999 while 12 States are expecting higher yields from 1998 .

As of August 1, 73 percent of the acreage in the 6 major barley producing States was fair to good. Hot weather and limited rainfall in July caused crop condition to deteriorate in the major barley producing States. Harvest was progressing behind normal in most of the States on August 1. Producers in the San Luis Valley of Colorado were discovering reduced yields due to frost damage that occurred in late spring. All Mid-Atlantic States expect an increase in yields as hot, dry weather limited disease problems.

Winter Wheat: Acres for harvest as grain are forecast at 35.6 million, down 11 percent from 1998. Harvest progress in the 19 major producing states had reached 89 percent completion by August 1. This is a point behind last year but a point ahead of average. Most Soft Red Winter (SRW) states harvests are complete. Hard Red Winter (HRW) harvests were complete, or nearly so, in the central and southern Great Plains. Forecasted head counts from the Objective Yield surveys in the six HRW States (Colorado, Kansas, Montana, Nebraska, Oklahoma, Texas) are down slightly from last month as is weight per head. Colorado and Texas head counts are at record highs while the average weights are the highest since 1985 and 1984, respectively. Kansas head weights equal last year's high. South Dakota's harvest is 20 points ahead of average with record high yields thus far. Dry, open weather has allowed Montana growers to harvest ahead of an average pace. Combined plant populations in the Pacific Northwest Objective Yield region are higher than average, but forecasted head weights are now well below normal; Idaho's are the lowest since 1988 and Oregon weights are the lowest of the '83-'99 period. The dryness pushed the Oregon harvest well ahead of normal, but Idaho and Washington trailed average. The Michigan harvest started in late June and was virtually complete by the end of July with a new record high yield. Harvested yields were better than previously expected in the SRW States. The Indiana combining finished mid-July with record yields across the state. Kentucky's mid-July finish confirmed last month's record high forecast and the North Carolina yield was better than previously expected. Collective head count and weight per head in the SRW Objective Yield States (Illinois, Missouri, Ohio) are about the same as last month and well above average. Ohio head counts are at record levels and Illinois' are the highest since 1989.

Durum Wheat: Acres planted and area for 1999 grain harvest have each been lowered 150,000 acres to 4.02 and 3.90 million, respectively. The changed planted level is still 8 percent higher than last year while acres for harvest are up 5 percent. The new acreages result from North Dakota's update survey. Yield prospects have declined in Montana but held steady in Minnesota and South Dakota. North Dakota's late planted crop trails average development by about a week. Late July's hot, humid weather saw condition ratings fall to 60 percent good or better as of August 1. Wheat midge and head scab are concerns in northeastern counties. The Durum Objective Yield survey samples range from grass green to ripe. Plant population forecasts are below average as average weight per head.

Other Spring Wheat: Harvested area for 1999 is forecast at 15.0 million acres, unchanged from last month but down 1 percent from last year. Acreage was 96 percent headed in the five major producing States as of August 1. This lags normal by two points. Harvest had started in all five States, but only South Dakota was more than 10 percent complete. Idaho's dryland spring wheat yield expectations have dropped sharply, but not enough to lower total yield. Early Washington spring harvest points to an average yielding crop with good quality. Montana's spring crop is in fair-to-good condition. Both North and South Dakota's spring wheat crops are rated as mostly good. Objective Yield Survey head number forecasts are above average in Minnesota and North Dakota and well below average in Montana. However, of the three, only Montana's average weight per head is above average.

Rice: Production is forecast at a record high 214 million cwt, 14 percent above 1998 and up 17 percent from 1997. Area for harvest is expected to total 3.58 million acres, unchanged from the June "Acreage" report but 8 percent above a year ago. Yields are expected to average 5,993 pounds per acre, up 324 pounds from 1998. As of August 1, crop development was behind normal in Arkansas, California, and Mississippi while Louisiana and Texas crop was ahead of normal. Rice harvest is underway in Louisiana and Texas. Crop condition was rated at 77 percent good to excellent across the major producing states on August 1.

Soybeans: Area planted, at 74.1 million acres, was decreased fractionally from the June acreage estimate and is now 2 percent above 1998 record acreage. Acres expected for harvest, at 73.3 million acres, decreased slightly from June and is now 3 percent above the 1998 acreage. Planting of the 1999 soybean crop was nearly complete as of June 27 as 97 percent had been planted. This compares to 96 percent a year ago and 94 percent for the five-year average. Several states (Kansas, Missouri, North Carolina, and South Carolina) still lagged behind the rest of the country in finishing planting at the end of June. Some replanting of soybean fields was common in areas affected by heavy rains and standing water. In the eight major producing States (Arkansas, Illinois, Indiana, Iowa, Minnesota, Missouri, Nebraska, and Ohio), the average planting date was the same as last year. The eastern Corn Belt States completed planting with the fewest weather disruptions while the western Corn Belt States were delayed by wet conditions. As of August 1, the soybean crop was rated mostly fair to excellent condition. Weather conditions varied widely through most of July. Soil moisture and temperatures were more favorable earlier in the month in most areas of the western Corn Belt and Southeast. Extremely high temperatures during the last two weeks of July added stress to most of the soybean growing areas, especially localities that were experiencing moisture shortages. States in the Mid-Atlantic and eastern Corn Belt experienced very dry conditions for much of July. As of August 1, 85 percent of the soybean acreage was blooming, 2 percentage points ahead of last year and 10 percentage points ahead of average. The percent of soybean acreage setting pods was 46 percent as of August 1, equal to a year ago but well ahead of the 34 percent average. Blooming and pod setting progress was most advanced in Illinois, Indiana, Iowa, Louisiana, Mississippi, and Ohio.

Dry Beans: Production of dry edible beans is forecast at 31.5 million cwt for 1999, up 2 percent from a year earlier and 7 percent above two years ago. This is the highest production since 1991's 33.8 million cwt. In the June 1999 "Acreage" report, U. S. planted and harvested acreage were estimated at 2.02 and 1.94 million acres, respectively. Planted area is now estimated at 1.99 million acres, 1 percent below 1998 but 7 percent above 1997. Harvested acres are now expected to be 1.90 million acres, down 1 percent from 1998 but 8 percent above two years ago. As of August 1, the average U. S. yield is forecast at 1,656 pounds per acre, up 3 percent from last year but 1 percent below two years ago. Average yields are 45 pounds per acre above last year. Production is expected to be above 1998 by 42 percent in California, 31 percent in Michigan, and 12 percent in Nebraska but down 20 percent from last year in North Dakota. In North Dakota, development of the crop is behind average due to late planting. As of August 1, 36 percent of the crop was podded compared to 86 percent last year and 63 percent on average. Also, 66 percent of the crop was rated good or excellent, above last year's condition of 59 percent good to excellent. Michigan's dry bean crop was planted early and has advanced ahead of normal. Most of the crop is in good to excellent condition with some damage from excessive rain. Navy beans replace black beans as Michigan's leading commercial class this year. In Nebraska, precipitation is about 25 percent above normal and crop condition as of August 1 was rated 69 percent good to excellent compared to 66 percent last year. California's dry bean crop is progressing well with many varieties in bloom and the blackeyes ready to harvest. The recent moderate temperatures should be beneficial to yields. As of August 1, the Minnesota crop rated 3 percent very poor, 12 percent poor, 37 percent fair, 38 percent good, and 10 percent excellent. In Colorado, dry beans are about 60 percent through flowering which is behind last year due to delayed planting, but the crop is reported to be in very good condition. In Wyoming, 90 percent of the dry beans have bloomed which is average even though emergence was hampered by cool and wet conditions during May and June. Most of New York's dry bean crop was in full bloom at the end of July but yields are expected to suffer due to drought stress. In Texas and Utah, production is expected to be higher than last year due to favorable growing conditions. U. S. planted acres of navy beans have increased 60 percent between 1998 and 1999 while planted acres of pintos and black beans are down 23 percent and 25 percent, respectively. Pink and large lima were the only other classes that decreased in acreage from 1998 to 1999. Pinto beans make up 38 percent of all planted acres, navies represent 21 percent, blacks 9 percent, and great northerns 7 percent the remaining 25 percent are distributed among the other classes.

All Hay: Production for 1999 is forecast at a record high 160.8 million tons, up 6 percent from 1998 and 5 percent higher than 1997. The all hay yield is forecast at 2.59 tons per acre (also a record), up 3 percent from last year. Acreage for harvest of all hay is estimated at 62.1 million acres, 3 percent higher than 1998. This is an increase of 100,000 acres from the June estimate as a result of an increase in the other hay estimate in North Dakota. Hay producers across the country are seeing both extremes this year. Operators in the Atlantic Coast States and eastern Corn Belt have been hit hard by the extreme dry conditions and higher than normal temperatures. Northwestern States have seen dry conditions stress non-irrigated hay; however, conditions have been good for the irrigated acreage. Most other areas of the U.S. have enjoyed very good conditions for hay production. Southern States, which were hit hard by drought last year, have rebounded well this year.

Alfalfa and Alfalfa Mixtures: Production is forecast at 83.2 million tons, 1 percent above 1998 and 6 percent above 1997. Yields are expected to average 3.47 tons per acre, equal to the record high level last year. Harvested area, at 24.0 million acres, is up 1 percent from 1998. Much improved weather conditions in most of California (leading producer) compared to last year resulted in higher production. The second and third largest producers (South Dakota and Wisconsin) are also expecting substantial increases in production.

All Other Hay: Production is forecast at a record high 77.6 million tons, 12 percent higher than last year's production. The average yield, at 2.04 tons per acre, is also a record high. If realized, this would be the first U.S. yield over 2.00 tons per acre. Harvested area is estimated at 38.1 million acres, 5 percent above last year's total. This level is also 100,000 acres above the June estimate, the result of a revision to the North Dakota estimate. This would be the largest harvested acreage since 1962.

Sugarbeets: Production is forecast at a record high 32.7 million tons, slightly above the previous record in 1998. Growers in the 12 sugarbeet-producing States expect to harvest 1,525,900 acres, 5 percent more than last year and the highest since 1,540,500 acres were harvested in 1969. The yield is forecast at 21.4 tons per acre, 1.1 tons below 1998. The late-July heat wave stressed the beet crop in Minnesota and North Dakota, but moisture supplies have been mostly adequate to sustain growth. Some areas in Minnesota have a surplus of soil moisture. Warm weather and adequate moisture supplies promoted rapid growth in Colorado. The Michigan sugarbeet crop is in mostly good condition due to timely rains. Cool weather aided development in California, with some fields setting record high yields in the Imperial Valley. In Wyoming, water supplies in the irrigation reservoirs are adequate.

Sugarcane: Production is forecast at a record high 36.6 million tons, 16 percent above the previous record of 31.7 million tons set last year. U.S. sugarcane growers intend to harvest a record high 972,500 acres for sugar and seed during the 1999 crop year, 3 percent more than last year's final harvested acres. The record high acreage is due to a 15,000 acre expansion in Louisiana and a 9,000 acre increase in Florida. The expansion in Louisiana is due to increased use of a new high-yielding variety that can be harvested mechanically even if it is severely lodged. Yield is forecast at 37.7 tons per acre, 3.0 tons above 1998. In Louisiana, a record high yield is expected due to ideal growing conditions, increased acreage of a high yielding variety, and increased utilization of a more efficient harvester. Warm weather and frequent rains have provided nearly ideal conditions in Florida also. Dry weather has prevailed in Hawaii, but no significant impact on yields has been experienced at this time. However, new plantings have been curtailed.

Hops: Hop production in Idaho, Oregon, and Washington is forecast at 62.1 million pounds for 1999, up 4 percent from last year but down 17 percent from the 1997 output. Acreage strung for harvest, at 34,240 acres, is off 7 percent from last year and is the lowest level since 1988 when 33,400 acres were harvested. Yield is forecast at 1,813 pounds per acre, 188 pounds higher than 1998 when extreme hot July and August temperatures in Washington and Idaho were responsible for the lower yields. Washington yield is forecast at 1,900 pounds per acre, the highest since 1995 and 214 pounds higher than last year. An increase in acres of the high-yielding Columbus/Tomahawk variety contributed to higher yield prospects. Growers in Washington are spraying for powdery mildew. Producers in Oregon indicate a yield of 1,690 pounds per acre, up 30 pounds from 1998, with harvest expected to start August 20 on the early varieties. The Idaho hop crop continues to develop normally under warm conditions and yield is expected to be 1,380 pounds per acre, 221 pounds higher than last year's yield.

HIGHLIGHTS:

Grain and soybean bids were sharply higher for the week. Good export sales, wheat harvest delays, and dry weather conditions across the Corn Belt were support factors. Wheat 1 to 11 cents higher. Corn 5 to 11 cents higher. Sorghum 11-25 cents higher. Soybeans 11 to 32 cents higher. Spring wheat harvest was slowed this week due to rainfall. Export sales were good as Korea, Egypt, Indonesia, and the Philippines major buyers. Strong corn and soybean bids also underpinned wheat bids. Corn and soybean bids moved sharply higher on good export demand, especially for corn. Crop condition ratings were lowered slightly this week by USDA as dry weather continued in the Midwest. Soybean meal and oil prices were stronger late in the week.

WHEAT:

Some flour mills were sold out of millrun for the month of September. Offers for October-December shipment were 60.00 FOB Portland and Seattle mills. There was some trading at central Oregon mills from 47.00-50.00 for nearby shipment. Trading was mostly slow. Flour mills in the Pacific Northwest were running from five to five and one-half days per week. Offers for wheat millrun rail delivered to Portland area feedmills were 65.00 in a limited test. Wheat millrun FOB the San Francisco Bay area mill door was 2.00 to 4.00 higher from 64.00-66.00; FOB the Los Angeles mill door was 4.00 to 5.00 higher from 64.00-66.00.

OTHERS: Prices on Sugarcane Molasses were steady, except for the California points which were steady to 5.00 higher. Molasses imports into the U.S. and large quantities of domestic molasses continued to pressure the sugarcane molasses market. Trading activity was light to moderate. Light demand, large supplies of other feed ingredients and large molasses supplies worldwide continued to pressure the market. Far Eastern demand is slightly stronger, but trading is below normal levels. European demand is weak with large supplies of molasses and comparable feedstuffs available. The U.S. sugarcane crop is in good condition with favorable growth and weather conditions being reported. Early reports show that Hurricane Bret did very little damage in the Texas sugarcane growing areas. Some areas in the region received some beneficial rainfall due to the hurricane. Rice Bran was mixed 5.00 lower to 3.00 higher; Millfeed was steady to 2.00 higher; Rice Hulls were mixed, 1.00 lower to 1.00 higher. Alfalfa Meal was mostly steady to 2.00 lower across the nation this past week.

Rice Stocks

Rough Rice Stocks Down

Rough rice stocks in all positions on August 1, 1999 totaled 16.6 million hundredweight (cwt), down 21 percent from the total on August 1, 1998. Stocks held on farms totaled 1.56 million cwt, accounted for 9 percent of the total, with mills and warehouses holding 91 percent of the stocks. Stocks of long grain totaled 10.9 million cwt, medium grain 5.02 million cwt, and short grain 644,000 cwt. August 1 rice stocks represent carryover from one marketing year to the next in all States except California, where the marketing year begins October 1. Milled rice stocks on August 1 totaled 3.88 million cwt, 19 percent below the comparable figure for a year ago. Milled rice stocks were comprised of 3.05 million cwt of whole kernel rice and 831,000 cwt of second heads, screenings and brewers rice.
